

# Senior Tender Engineer, Telecommunication

*Are you the experience Telecom tech person who has a passion for commercial work and tender process? Do you want to enhance or explore your skills within commercial scope of work? Would you like to work in an organization where you do the puzzle instead of being a part of the puzzle? Then come join us!*

## **Your position**

As our new Senior Telecommunication Tender Engineer, you will join our dedicated Global Tender team, consisting of ten welcoming colleagues located in Denmark and Singapore. Together, we gather telecommunication tenders cover a wide spectrum of projects, from the latest network solutions to CCTV, Radio and entertainment systems.

You will have the chance to engage in cutting-edge technology and innovation, working on projects that push the boundaries of telecommunication solutions. Above all, your work will make a real change for life offshore and the global energy sector.

Your place of work will be at our office in Singapore. The position is full-time, and you can expect to travel up to 25 days per year.

*"This is your opportunity to join a team of technical multi-disciplinary experts running offshore telecommunication tender projects for large international organizations. You will be involved in projects of different sizes all over the world, based on a team environment where we succeed together,"* says Søren Rønne Barslund, Senior Manager, Telecom Tender.

## **Your tasks & responsibilities**

In your role as a Senior Telecommunication Tender Engineer, you will be responsible for producing commercial and technical proposals for telecommunication systems based on customers' inquiries and requirements.

Your tasks will include but are not limited to:

Finding and documenting the right technical solutions while engaging with our technical teams,

HSEQ, Procurement and other relevant departments

Preparing potential project risk analyses and working to increase profit margins

Coordinating and gathering tender packages

Assisting in sales and project execution assignments

## **Your profile & qualifications**

We are looking for an outgoing and analytical professional who is passionate about tender projects and wants to leave their personal mark on it. You have a proactive and organized approach to your work and thrive in a workday with lots of variation.

To succeed in this position, we imagine that you have:

A relevant educational background as Electronic Engineer.

As alternative to an engineer education could be an education as Electronical Technician.

Previously experience within Energy or Marine telecommunication is an advantage, but not a requirement to succeed in the position.

Experience with tenders is an advantage, however no prior tender experience is required; we offer complementary learning and development opportunities for the enthusiastic candidate.

A commercial mindset.

Excellent communication skills in English, both verbal and written
