

Electrical Supervisor for Site

Ready for a challenging and rewarding career in the dynamic green energy industry? Join us as an electrical supervisor for building offshore substations at our construction site in Aalborg.

Your position

In this role, you will supervise teams of 10-20 members in cable pulling as well as cableway construction, installation and termination. You will have the possibility to grow your expertise within the areas of high- and low-voltage systems. Above all, your work will make a real difference in meeting the world's growing energy demand.

"As a member of our team, you'll be working alongside a close-knit group of dedicated people who are at the forefront of the green energy transition. You'll have the exciting opportunity to work with large-scale, specialized engineered platforms, and our focus on quality and safety is unmatched,"- says Peter Carlsen, Director, Site Operations

Your tasks & responsibilities

You will be responsible for ensuring a structured and smooth workflow for your teams as well as interacting with people from many different backgrounds and cultures.

Your tasks will include, but are not limited to:

- Supervision of teams
- Planning of work activities
 - o Supervise cable pulling
 - o Supervise general construction/installation
 - o Supervise termination works
 - o Perform in-depth quality spotchecks
- Coordinate works according to project schedule in close collaboration with foremen, engineers, and site management
- Conduct toolbox talks
- Communicating with subcontractors, clients and stakeholders across the project organisation
- Progress reporting and follow up

Your profile & qualifications

We imagine that you enjoy taking responsibility and that you thrive in the construction site culture.

You stay calm when things change rapidly, and you know that your capability to keep a clear overview in stressful situations is one of your biggest assets and strongly needed.

To succeed in this position, we imagine that you have:

- A relevant background such as production electrician, electrical engineer or maybe you've worked as foreman on larger construction sites
- Team management experience preferably from the construction industry
- Passion about getting things done in the right way and to collaborate with all kinds of people and nationalities with various cultural backgrounds.
- Great communication and interpersonal skills
- Fluency in English, verbal and written

Welcome to Semco Maritime

At Semco Maritime, we create change. For people. For projects. And for the global energy sector.

With us, you will join a community of over 2,500 of the most dedicated thinkers and doers in the energy industry who are driving real change and making their own personal mark on the global energy landscape.

While everyone knows why the energy transition is vital, we are concerned with the journey. How to get there. By providing the answers needed to make change real. Because we believe that global energy ambitions can only be realized through hard work and clever pragmatic solutions. This is what we do. This is what we invite you to participate in.

So yes, working for us will change the energy sector – and may well change you too.

Care to join the movement?

Change. With us.

We conduct our interviews on an ongoing basis, so if you are interested, do not hesitate to submit your application as soon as possible via the link on the page.
