

# Control Room Operator Trainee

## CCR Operator Trainee

- Offshore position mobilizing from Esbjerg, Denmark
- 2/3 rotation (3 weeks offshore/3 weeks onshore)
- 12 hours per shift / day shift expected
- Participation in required courses must be expected during home period
- Expected Start date: ASAP

## Key Responsibilities

As a trainee you play a vital role in assisting the Control Room Operator during commissioning and test face of the platform, including:

- Monitoring and control of the platform process, utility and safety systems from the central control room.
- Communication to process operators as required.
- Monitoring the overall safety related to ESD and F&G systems.
- Monitoring ongoing work on the platform as far as related to safety and environmental issues.
- Daily reporting and administrative activities as required.

## Who we are looking for:

The ideal candidate has a solid technical background and eager to learn. Relevant experience may stem from process industry, power plant operation or similar. Good would be an advantage, but not a demand.

You work in a systematic and proactive manner, paying special attention to details and the predefined processes and guidelines. In addition, you are patient and comfortable with routine tasks.

You are characterized by strong collaborative skills, a robust mindset, and a good health. Good English skills (Reading, writing, speaking and listening).  
Living nearby Esbjerg would be preferable.
