

Senior Structural Engineer

Are you ready to shape the future of the global energy sector? Join our team as a Senior Structural Engineer and help us lead the way in delivering innovative offshore structural solutions.

Your position

In your new position as a Senior Structural Engineer in the Engineering division, you will be a valuable member of the dedicated team, whose mission is to ensure the effective and timely execution of the structural design for our Offshore Substation Projects. You will have the chance to influence large-scale energy projects and collaborate closely with various stakeholders to deliver high-quality designs. Above all, your work will make a real difference in shaping the future of offshore wind energy.

The position is full-time, and your work location can be either at our office in Esbjerg, Copenhagen or Gdynia. You should expect up to 10-30 travel days annually.

“As a Senior Structural Engineer, you will play an important role in our prestigious EPC projects, where corporation with internal team members and external stakeholders is essential for success.”

- Senior Manager, Torben Vestergaard

Your tasks & responsibilities

As a Senior Structural Engineer, you will be responsible for managing the interface of all technical issues affecting structural design and ensuring timely delivery of documentation to steel fabricators. Your tasks will include but are not limited to:

- Coordinating with structural engineering partners to meet project timelines.
- Reviewing and ensuring compliance of contractor deliveries with project codes and specifications.
- Participating in meetings with equipment suppliers to handle structural discipline interfaces.
- Monitoring and controlling the weight development of topside steel.
- Identifying and managing design changes throughout the project lifecycle.

Your profile & qualifications

We are looking for an outgoing and positive structural engineer who is passionate about offshore structural design and eager to contribute to the energy transition. You have a proactive and organized approach to your work and thrive in a collaborative environment.

To succeed in this position, we imagine that you have:

- A Bachelor or Master in Structural or Mechanical Engineering
- Solid understanding of offshore structural design
- Experience in project management.
- Strong communication and teamwork skills
- Fluency in English

Welcome to Semco Maritime

At Semco Maritime, we create change. For people. For projects. And for the global energy sector.

With us, you will join a community of over 2,500 of the most dedicated thinkers and doers in the energy industry who are driving real change and making their own personal mark on the global energy landscape.

While everyone knows *why* the energy transition is vital, we are concerned with the journey. *How* to get there. By providing the answers needed to make change real. Because we believe that global energy ambitions can only be realized through hard work and clever pragmatic solutions. This is what we do. This is what we invite you to participate in.

So yes, working for us will change the energy sector – and may well change you too.

Care to join the movement?

Change. With us.
