Business Intelligence Data Engineer

Do you enjoy working hands on with data and making sure it supports the business? Are you motivated by creating reliable BI solutions built on Business data? Then you might be the BI Data Engineer we are looking for at Semco Maritime.

Your Position

As BI Data Engineer within IT, you will be part of our Digital and IT organization and work closely with colleagues across the world. You will help ensure that our BI solutions are built on well structured, consistent, and trusted data.

At Semco Maritime safety is a core value, and in this role, you will contribute to maintaining and promoting a strong safety culture while delivering innovative solutions. Above all, your work will make a real change for the global energy sector.

This is a practical and operational role where you will work directly with data models, datasets, and Power BI solutions used in everyday reporting and decision making. You will collaborate closely with data owners and business stakeholders to turn requirements into usable BI solutions and continuously improve data quality and reporting.

Your place of work will be at our Global HQ located in Esbjerg, the hub of the Danish energy industry, right on the waterfront – views do not get any better than this. The position is full-time, and you can expect to travel 5-10 days per year.

Tasks and responsibilities

- Develop and maintain BI datasets and data models with a strong focus on data quality

- Build and enhance Power BI reports and dashboards

- Work with data transformation and validation processes

- Ensure consistency across systems

- Support documentation efforts and monitor data quality

- Contribute to improving BI and data standards and ways of working

Your profile & qualifications

We are looking for someone who enjoys working closely with both data and people, and who brings a solid understanding of data governance, data quality principles and are able to deliver practical, real-world solutions. To succeed in this position, we imaging that you have:

- Experience with BI, data modelling, and Power BI

- Relevant educational background or equivalent experience

- Strong understanding of data quality as the foundation for reliable reporting

- Comfortable working with complex datasets

- Skilled in collaborating with stakeholders

Welcome to Semco Maritime

At Semco Maritime, we create change. For people. For projects. And for the global energy sector. With us, you will join a community of over 2,300 of the most dedicated thinkers and doers in the energy industry who are driving real change and making their own personal mark on the global energy landscape.

While everyone knows *why* the energy transition is vital, we are concerned with the journey. *How* to get there. By providing the answers needed to make change real. Because we believe that global energy ambitions can only be realized through hard work and clever pragmatic solutions. This is what we do. This is what we invite you to participate in.

Safety is at the core of everything we do, and we are committed to protecting our people, partners, and the planet as we work towards a sustainable energy future.

So yes, working for us will change the energy sector – and may well change you too.

Care to join the movement?

Change. With us.
