

Security Operations Engineer

Are you a structured and analytically minded security professional who wants to leave your mark on the global energy industry? If so, we want to hear from you!

Your position

In your new position as Security Operations Engineer in the Digital & IT division, you will be a valuable member of our growing information security team whose mission is to build practical, technically sound security solutions across the organisation. You will have the chance to work at the intersection of security, technology, and business - with real influence on how security is designed and implemented in practice. Above all, your work will make a real change for the global energy sector.

At Semco Maritime, safety is a core value, and in this role, you will contribute to maintaining and promoting a strong security and safety culture while delivering innovative solutions.

Your place of work will be at either our Global HQ in Esbjerg, the hub of the Danish energy industry, or our satellite office in Nordhavn, Copenhagen. The position is full-time, and you can expect to travel approximately 10 days per year.

“At Semco Maritime, we build security through curiosity, collaboration, and ownership. Our security function focuses on developing practical, technically sound solutions in an environment where security is taken seriously and continuously improved.” - CISO, Eri Kejser

Your tasks & responsibilities

As a Security Operations Engineer, you will be responsible for operating and continuously improving security controls across our cloud and on-premises environments.

Your tasks will include but are not limited to:

- Designing, implementing, and improving information security controls across cloud and on-prem environments, with a strong focus on Azure
- Owning and developing core security capabilities such as identity and access management, vulnerability management, and secure configuration practices
- Performing security threat analysis in connection with incidents, near-misses, and risk scenarios, and using findings to strengthen controls and overall resilience
- Translating security requirements, risk assessments, and policies into technically actionable controls and implementation guidance
- Supporting and adhering to health, safety, and environmental standards in all activities

Your profile & qualifications

We are looking for a structured and analytical security professional who is passionate about operational security and wants to leave their personal mark on it. You have a pragmatic and collaborative approach to your work and are eager to drive continuous security improvement in a complex, international environment.

To succeed in this position, we imagine that you have:

- A relevant degree and a minimum of 5 years of hands-on experience in a technical information security role with an engineering or implementation focus
- Strong technical understanding of Azure and cloud security concepts, including identity and access management, networking, logging, and monitoring
- Practical experience with identity and access management and vulnerability management in enterprise environments
- Ability to assess new software, platforms, and vendors from a security perspective, translating identified risks into concrete requirements and recommendations
- Knowledge of security standards and frameworks relevant to operational security (e.g. ISO 27001, NIST, CIS Controls)

Welcome to Semco Maritime

At Semco Maritime, we create change. For people. For projects. And for the global energy sector. With us, you will join a community of over 2,300 of the most dedicated thinkers and doers in the energy industry who are driving real change and making their own personal mark on the global energy landscape.

While everyone knows *why* the energy transition is vital, we are concerned with the journey. *How* to get there. By providing the answers needed to make change real. Because we believe that global energy ambitions can only be realized through hard work and clever pragmatic solutions. This is what we do. This is what we invite you to participate in.

Safety is at the core of everything we do, and we are committed to protecting our people, partners, and the planet as we work towards a sustainable energy future.

So yes, working for us will change the energy sector – and may well change you too.

Care to join the movement?

Change. With us.
