

Electrical Engineer

Ready for a challenging and rewarding career in the dynamic energy industry? Join us as an Electrical Engineer and use your skills to ensure the safety and success of our modification projects.

Your position

In your new role as an Electrical Engineer in our Transitional Energies division, you will be a valuable member of our Engineering & Projects team comprised of 20 dedicated people whose mission is to deliver high quality projects for the Energy industry. Here, you will play a crucial role in ensuring the safety and success of these projects by assisting our and skilled workers in carrying out their tasks effectively.

At Semco Maritime safety is a core value, and in this role, you will contribute to maintaining and promoting a strong safety culture while delivering innovative solutions. Above all, your work will make a real change for the global energy sector.

Your place of work will be at our Global HQ located in Esbjerg, the hub of the Danish energy industry, right on the waterfront – views do not get any better than this. The position is full-time, and you should expect to go offshore on different occasions, but most of your work will be onshore.

Your tasks & responsibilities

As an Electrical Engineer, you will have a wide range of challenging tasks, primarily focused on projects, supporting our tender team, work prepare and ensuring the necessary information to a high standard.

Your tasks will include, but are not limited to:

- Technical review of CFI packages
- Estimation for Tender team
- Conducting constructability reviews of design packages.
- Creating job descriptions, job cards, job packages, and work permits for our workers performing the modification work.
- Taking part in offshore & site installation planning.
- Conducting safety reviews to guarantee the safe execution of the project.
- Ordering and preparing materials and tools for offshore & site execution.
- Supporting and adhering to health, safety, and environmental standards, in all activities

Your profile & qualifications

As a person, you are structured, have a good knowledge of understanding design packages from CFI to installation. You have an analytical approach to your work and demonstrate great attention to detail, ensuring that you have all the essential knowledge required to succeed. In addition, working as part of a team brings you joy, and you can effectively communicate with numerous stakeholders.

To succeed in this position, we imagine that you have:

- A relevant educational background, for instance as an Electrical Engineer, Marine Engineer, or a certified electrical background.
- Practical experience with offshore project supervision and execution is preferred.
- Good communication skills in Danish or English.
- If not already in possession of the relevant offshore certificates, you must be able to go through the certification process.
- Knowledge of safety standards

Welcome to Semco Maritime

At Semco Maritime, we create change. For people. For projects. And for the global energy sector. With us, you will join a community of over 2,500 of the most dedicated thinkers and doers in the energy industry who are driving real change and making their own personal mark on the global energy landscape.

While everyone knows *why* the energy transition is vital, we are concerned with the journey. *How* to get there. By providing the answers needed to make change real. Because we believe that global energy ambitions can only be realized through hard work and clever pragmatic solutions. This is what we do. This is what we invite you to participate in.

Safety is at the core of everything we do, and we are committed to protecting our people, partners, and the planet as we work towards a sustainable energy future.

So yes, working for us will change the energy sector – and may well change you too.

Care to join the movement?

Change. With us.

We conduct our interviews on an ongoing basis, so if you are interested, you must submit your application as soon as possible via the link on the page. If you have any questions, you are
