

Service Technician, High Voltage Offshore Wind

Are you an experienced and motivated electrician with high voltage experience? And do you want to make a real difference by supporting the world's growing energy demand? Then this is your chance. Join us!

Your position

In your new position as Service Technician, High Voltage in the Renewables division, you will be a valuable member of the dedicated MV/HV service team who specialize in providing electrical services for offshore wind projects.

Your team is dedicated to testing and servicing power systems and plays a crucial role in our efforts to establish ourselves as a leading service provider in the rapidly growing offshore wind industry. In this role, you will function as a Technician within the Medium Voltage and High Voltage electrical field and get the chance to work with many exciting and complex systems.

At Semco Maritime safety is a core value, and in this role, you will contribute to maintaining and promoting a strong safety culture while delivering innovative solutions. Above all, your work will make a real change for the global energy sector.

Your place of work will be at our Global HQ located in Esbjerg, the hub of the Danish energy industry, right on the waterfront – views do not get any better than this. The position is full-time, and you can expect to travel 100+ days per year.

Your tasks & responsibilities

As a Service Technician High Voltage, you will have a variety of service and maintenance tasks on WTG's, OSS's & SPS.

Your tasks will include but are not limited to:

- Maintenance of Offshore Substations and Wind Turbines
- Service tasks on Switch Gears and Transformers
- Test of protection devices such as relay, circuit breakers etc.
- Electrical SPS on Drilling Rig's (SPS)

Your profile & qualifications

What we value most for this position is a strong understanding of and interest in the MV/HV electrical field. We are a supportive team who prioritizes each other and safety above all else. As such, a strong safety mindset and a collaborative, team-oriented approach to your work is a must. To succeed in this position, we imagine that you have:

- An educational background as an Electrician
- High Voltage and GWO training certificates (you should be able to upload your certificates unlimited)
- Switching Experience on offshore Wind Assets
- Minimum 3 years Experience working as a High Voltage Technician
- Experience with working with High Voltage Cables
- Work permits to working in the EU
- Able to read technical documents and SLD and trouble shoot

Welcome to Semco Maritime

At Semco Maritime, we are energy pioneers - working together to create a sustainable energy future through our innovative solutions and services. With us, you will be part of a community of over 2,000 dedicated people who are driving change and making a real difference in meeting the world's growing energy demand.

You will experience an international, inclusive and inspiring workplace where diversity, collaboration and a healthy work-life balance are not just buzzwords but integrated values that drive our success. We offer flexible working arrangements, on-site fitness facilities, and tasty, organic food in our canteen that will have your taste buds singing. Plus, we like to have fun along the way with lots of fun social activities!

We conduct our interviews on an ongoing basis, so if you are interested, please submit your application as soon as possible via the link on the page.

If you have any questions, you are more than welcome to contact Christian Poulsen, Head of MV & HV Service at +45 2294 4199.

Let's drive change together. Apply today to leave your mark on the global energy industry.

We cannot wait to hear from you!
