

Service Telecommunication Engineer

Does the idea of having a vast and diverse range of working environments, spanning across different countries and cultures appeal to you? Are you ready to take your career to the next level in the dynamic energy industry? Then join us at Semco Maritime!

Your position

As our new Service Engineer, you will be a part of the high-performing Service team in our Technology Solutions Division. Together, the team are working to ensure the service and maintenance of our global clients' offshore operations. You will work on a variety of telecommunication projects both domestically and internationally, where one day you may be on-site offshore in Brazil providing support to our clients and the next you could be back at our headquarters in Esbjerg offering input for tenders.

At Semco Maritime safety is a core value, and in this role, you will contribute to maintaining and promoting a strong safety culture while delivering innovative solutions. Above all, your work will make a real change for the global energy sector.

"This is a unique opportunity, if you like a big variety in your tasks, and loves to travel all over the world. You will be experiencing a working environment where results are created together based on a high level of professionalism and dedication." - Manager Service, Lisbeth Christiansen.

Your tasks & responsibilities

You will be responsible for providing support to our international clients in the servicing and maintenance of telecommunication systems, both remotely and by working on-site offshore.

Your tasks will include, but are not limited to:

- Being actively involved in the installation and annual preventive maintenance of customer equipment within telecom systems such as PAGA, Tetra, VHF, CCTV, Network, etc.
- Diagnosing and resolving issues
- Overseeing projects onshore and offshore
- Be part of the on-call for our clients with SLA
- Assisting in commissioning and engineering for Brownfield projects

Your profile & qualifications

We are looking for a self-motivated, proactive person, who can work independently to find the best solutions for our clients.

To succeed in this position, we expect that you have:

- A technical educational background, such as a degree in Applied Industrial Electronics or Engineering related
- Experience in the offshore industry and in creating work packages including method statements and risk assessments
- An interest in travelling to the locations where potential clients are operating

Welcome to Semco Maritime

At Semco Maritime, we create change. For people. For projects. And for the global energy sector. With us, you will join a community of over 2.500 of the most dedicated thinkers and doers in the energy industry who are driving real change and making their own personal mark on the global energy landscape.

While everyone knows *why* the energy transition is vital, we are concerned with the journey. *How* to get there. By providing the answers needed to make change real. Because we believe that global energy ambitions can only be realized through hard work and clever pragmatic solutions. This is what we do. This is what we invite you to participate in.

Safety is at the core of everything we do, and we are committed to protecting our people, partners, and the planet as we work towards a sustainable energy future.

So yes, working for us will change the energy sector – and may well change you too.

Care to join the movement?

Change. With us.

Your primary place of work will be at our office in Esbjerg. The position is full-time, and you should expect 100+ travel days per year to locations across the world to ensure the smooth functioning of telecommunications systems.

We conduct our interviews on an ongoing basis, so if you are interested, you must submit your application as soon as possible via the link on the page. If you have any questions, you are welcome to contact Lisbeth Christiansen, Manager Service at lichr@semcomaritime.com.
