

Cloud Architect

Do you want to shape the future of cloud infrastructure in the energy sector? Are you an experienced and motivated Cloud Architect with a passion for scalable and secure solutions? If so, we want to hear from you!

Your position

In your new position as *Cloud Architect* in the *IT & Digitalisation* division, you will be a valuable member of a dynamic, global team dedicated to driving innovation and efficiency through cloud transformation. You will have the chance to influence enterprise-wide infrastructure by designing and managing secure, scalable cloud solutions. Above all, your work will make a real change for the global energy sector.

At Semco Maritime, safety is a core value, and in this role, you will contribute to maintaining and promoting a strong safety culture while delivering innovative solutions.

Your place of work will be in Germany (Hamburg, Emden or Bremen) or Denmark. The position is full-time, and you can expect to travel occasionally.

"We are a team that values openness, mutual support, and the drive to continuously improve. If you want to work hands-on with modern infrastructure while helping secure the future of the energy sector, this is the place to be."

Senior Manager, Operation & Service, Renny Ulka

Your tasks & responsibilities

As a *Cloud Architect*, you will be responsible for leading the company's journey to the cloud.

Your tasks will include but are not limited to:

- Planning and managing migration from on-premises to cloud-based systems
- Designing and implementing secure, scalable cloud solutions
- Monitoring and optimizing performance and cost efficiency
- Ensuring seamless integration between cloud and on-prem systems
- Supporting and adhering to health, safety, and environmental standards in all activities

Your profile & qualifications

We are looking for an independent and systematic Cloud Architect who is passionate about cloud technologies and wants to leave their personal mark on our digital transformation. You have a proactive and structured approach to your work and are eager to work across teams and borders.

To succeed in this position, we imagine that you have:

- Several years of experience in cloud architecture, including migration projects
- Proven experience with Microsoft Azure and infrastructure as code (IaC)
- A bachelor's degree in Computer Science, IT, or a related field
- Relevant certifications (e.g., Microsoft Certified Azure Solutions Architect)
- Solid analytical and collaboration skills and fluent English communication

Welcome to Semco Maritime

At Semco Maritime, we create change. For people. For projects. And for the global energy sector.

With us, you will join a community of over 2,500 of the most dedicated thinkers and doers in the energy industry who are driving real change and making their own personal mark on the global energy landscape.

While everyone knows why the energy transition is vital, we are concerned with the journey. How to get there. By providing the answers needed to make change real. Because we believe that global energy ambitions can only be realized through hard work and clever pragmatic solutions. This is what we do. This is what we invite you to participate in.

Safety is at the core of everything we do, and we are committed to protecting our people, partners, and the planet as we work towards a sustainable energy future.

So yes, working for us will change the energy sector – and may well change you too.

Care to join the movement?

Change. With us.
