

Technical Buyer

Are you an experienced and motivated Technical Buyer and do you want to leave your mark on the global energy industry? If so, we want to hear from you!

Your role

Your primary responsibility will be to support the tendering and project & Fabrication procurement activities within Rig & Marine, focusing on engineering, project management, project execution, fabrication, and installation services for offshore drilling rigs and offshore wind installation vessels. At Semco Maritime safety is a core value, and in this role, you will contribute to maintaining and promoting a strong safety culture while delivering innovative solutions. Above all, your work will make a real change for the global energy sector.

Your place of work will be at our Global HQ located in Esbjerg, the hub of the Danish energy industry, right on the waterfront – views do not get any better than this. The position is full-time.

Your tasks & responsibilities

As our Technical Buyer, you will play a key role in managing procurement and supplier relationships for our projects Rig & Marine and our Fabrication Facilities, with a special emphasis on technical purchases related to fabrication.

Your tasks will include but are not limited to:

- Collaborate closely with internal teams and external suppliers to ensure technically sound procurement solutions that align with project requirements.
- Drive procurement activities from sourcing to final delivery, ensuring compliance with company procedures and industry best practices.
- Utilize technical knowledge to support decision-making in supplier selection and negotiation processes.
- Oversee contract execution, ensuring timely deliveries and proper documentation of procurement activities.
- Identify and mitigate potential risks in the supply chain, proactively addressing challenges related to fabrication and material supply.
- Ensure seamless integration of procurement activities with project timelines, maintaining structured documentation and clear communication with stakeholders.
- Maintain a systematic approach to supplier and subcontractor engagement, ensuring alignment with Semco Maritime's commercial and operational goals.
- Support continuous improvement initiatives by optimizing procurement strategies and leveraging technical insights for better cost efficiency.
- Manage administrative procurement tasks, including creating purchase orders (POs), reviewing and approving invoices, and ensuring accurate documentation of transactions.

Your qualifications and skills

You are ambitious, results-oriented, and a great negotiator who thrives in a dynamic international environment. Ideally, you have over three years of experience in purchasing within projects, with a strong capability in handling technical aspects of procurement, particularly in fabrication. You must be a capable, confident team player with strong stakeholder management skills.

A key responsibility will be aligning the project procurement process and strategy with Semco Maritime's values and commercial objectives. Experience from the Energy, Offshore, or Oil & Gas industry or with IFS ERP systems is an advantage but not a requirement.

Your profile:

- Strong focus on delivering quality work
- Proactive with a high drive
- Team player
- Structured and analytical
- Excellent interpersonal, communication, and writing skills
- Fluent in spoken and written English

Welcome to Semco Maritime

At Semco Maritime, we create change. For people. For projects. And for the global energy sector.

With us, you will join a community of over 2.500 of the most dedicated thinkers and doers in the energy industry who are driving real change and making their own personal mark on the global energy landscape.

While everyone knows why the energy transition is vital, we are concerned with the journey. How to

get there. By providing the answers needed to make change real. Because we believe that global energy ambitions can only be realized through hard work and clever pragmatic solutions. This is what we do. This is what we invite you to participate in.

Safety is at the core of everything we do, and we are committed to protecting our people, partners, and the planet as we work towards a sustainable energy future.

So yes, working for us will change the energy sector – and may well change you too.

Care to join the movement?

Change. With us.
