

# Firefighting Service Engineer

*Are you a technically skilled and self-motivated service engineer with experience in offshore operations and a passion for firefighting systems? Join our high-performing Technology Solutions team and help deliver essential firefighting services to the global energy sector.*

## **Your position**

In your new position as Firefighting Service Engineer in the Technology Solutions division, you will be a valuable member of our Service Team in Denmark, whose mission is to deliver high-quality firefighting system services and maintenance to our clients in the offshore energy industry. You will have the chance to work hands-on with critical safety systems across international offshore operations.

At Semco Maritime, safety is a core value, and in this role, you will contribute to maintaining and promoting a strong safety culture while delivering innovative and reliable service solutions.

Your place of work will be at our Global HQ located in Esbjerg, the hub of the Danish energy industry, right on the waterfront – views do not get any better than this. The position is full-time, and you can expect to travel 100+ days per year.

*"This is a great opportunity to make a real difference in offshore safety – while being part of a skilled, supportive team."* - Director, Service, Adrian Marcel Rozsondai

## **Your tasks & responsibilities**

As a *Firefighting Service Engineer*, you will be responsible for the delivery, coordination, and execution of firefighting service and maintenance tasks for our on- and offshore clients.

Your tasks will include but are not limited to:

- Performing hands-on service, troubleshooting, and supervision of firefighting systems (Water Mist, Deluge, Foam, Argonite, etc.)
- Planning and executing maintenance and installation work both onshore and offshore
- Producing and reviewing work packages, including RAMS (Risk Assessments and Method Statements)
- Providing remote support and technical input to tenders and quotations
- Engaging directly with clients and identifying new service opportunities
- Supporting and adhering to health, safety, and environmental standards in all activities

## **Your profile & qualifications**

We are looking for a proactive and technically competent service engineer who is passionate about operational safety and firefighting systems. You have a structured and independent approach to your work and are eager to contribute to international offshore projects.

To succeed in this position, we imagine that you have:

- A technical education or qualification (engineering or technician – mechanical and/or electrical)
- Experience from the offshore industry, preferably 1–5 years
- Knowledge of firefighting systems in an operational setting
- Strong communication skills and the ability to work independently
- Willingness and ability to travel 100+ days annually and work offshore
- Experience with work package preparation and safety documentation (RAMS)

## **Welcome to Semco Maritime**

At Semco Maritime, we create change. For people. For projects. And for the global energy sector.

With us, you will join a community of over 2,500 of the most dedicated thinkers and doers in the energy industry who are driving real change and making their own personal mark on the global energy landscape.

While everyone knows *why* the energy transition is vital, we are concerned with the journey. *How* to get there. By providing the answers needed to make change real. Because we believe that global energy ambitions can only be realized through hard work and clever pragmatic solutions. This is what we do. This is what we invite you to participate in.

Safety is at the core of everything we do, and we are committed to protecting our people, partners, and the planet as we work towards a sustainable energy future.

So yes, working for us will change the energy sector – and may well change you too.
