

# Manager for Layout Team

*Thinking about changing your career? Our Renewables Division is looking for you with solid experience in layout coordination or 3D design. Have you already undertaken a leadership role, or are you keen to enhance your leadership skills to ensure excellent layout deliveries on large-scale offshore substation projects? If so, we want to hear from you!*

## **Your position**

In your new position as Manager in the Renewables Engineering division, you will lead a skilled team of ten Layout Engineers and 3D Engineers/Technical Designers. Your team is crucial in managing the layout of Offshore Substations and implementing designs in the 3D model.

Your place of work will be at our Global HQ located in Esbjerg - the hub of the Danish energy industry - and for working with colleagues on the other locations you should expect around 10-30 travel days per year.

*"This position offers a unique combination of technical development and team leadership, setting the stage for significant contributions to the renewable energy sector". – Torben Vestergaard, Senior Manager, Head of Mechanical & Layout.*

## **Your tasks and responsibilities**

You will be responsible for maintaining and developing layout and 3D deliveries within the context of large-scale offshore substation EPC-projects, and you will play a pivotal role in ensuring continuous performance, quality, and thriving within your team and across the entire technical discipline portfolio. Your tasks will include, but are not limited to:

- Leadership and management of the team, including supervision and coaching
- Supporting your team with company knowledge, technical solutions, and project-related tasks
- Resource coordination and planning in collaboration with our project management
- Ensuring performance and quality across the entire technical discipline portfolio
- Continuously focus on development of process and tools
- Cooperation and coordination with other technical areas

## **Your profile and qualifications**

You are – or want to become - a people manager with focus on setting your team up for success while you enjoy leading coordination, technical solutions, and project tasks with an eye for anticipating potential bottlenecks in project execution. To us it means that you have a structured and solution-oriented approach as well as you are eager to develop both personal and team skills.

You will be a part of a team that prioritizes deliveries and details on point and a flexible working environment. We are sociable, helpful, and open to input as well as we are dedicated, executory, and work forward in a structured manner with respect for the agility that is a natural part of our core task. We want the same from you.

Besides solid experience in Layout coordination or 3D design we image that you:

- Hold an educational background in structural, mechanical, marine engineering or production technology/technical designer
- Preferably have experience in a leadership role balancing technical expertise with people development
- Have excellent written and verbal communication skills in English
- Are a dedicated team player who enjoy building long-term relations

## **Welcome to Semco Maritime**

At Semco Maritime, we create change. For people. For projects. And for the global energy sector. With us, you will join a community of over 2,400 of the most dedicated thinkers and doers in the energy industry who are driving real change and making their own personal mark on the global energy landscape.

While everyone knows *why* the energy transition is vital, we are concerned with the journey. *How* to get there. By providing the answers needed to make change real. Because we believe that global energy ambitions can only be realized through hard work and clever pragmatic solutions. This is what we do. This is what we invite you to participate in.

So yes, working for us will change the energy sector – and may well change you too.

Care to join the movement?

## **Change. With us.**

We conduct our interviews on an ongoing basis, so if you are interested, please submit your application as soon as possible via the link on the page.
